

Backend Requirements - Live Trading Display Dashboard

Authentication System

- JWT Authentication
- bcrypt Password Hashing
- Login
- Logout
- Refresh Tokens
- Protected Routes

User Management

- Store Users
- Manage Sessions
- Credential Validation

Market Data Service

- Connect to Client API
- Receive Spot Prices
- Receive Futures Prices
- Receive Option Prices

Redis Layer

- Cache Latest Prices
- Fast Data Retrieval

OHLC Engine

- 1 Min
- 3 Min
- 5 Min
- Custom Timeframe
- Open High Low Close Aggregation

Pivot Engines

- Classic Pivot
- Camarilla Pivot
- Fibonacci Pivot

Indicators

- Call Indicator
- Put Indicator
- Divergence Engine

WebSocket Server

- Broadcast Live Data
- Realtime Updates
- Reconnect Handling

Module 2 Engine

- 10 Strike Tracking
- Minute Grid Engine
- Day High Detection
- Day Low Detection
- Trend Badge
- Reversal Detection
- Call Down Filter
- Sorting Engine
- Top Performer Engine

CSV Export

- Generate Exportable CSV Files

Database Collections

- users
- watchlists
- pivot_levels
- futures_ohlc
- spot_ticks
- m2_sessions
- m2_strike_ticks

REST APIs

- Authentication APIs
- Market APIs

- Module 1 APIs
- Module 2 APIs
